WHAT I WANT TO GET OUT OF THE NETWORK:

- increase the interaction with other European universities and businesses
- promoting, exchanging, spreading and exploiting new innovative ideas
- knowledge and technology transfer

WE ARE THE ORGANIZATION THAT:

- providing innovation and technology transfer services as well as IP rights-related services in every substantial scientific field which are in focus of the research activity of University of Debrecen;
- provides wide-range innovation services for the researchers, students and partners of the university and business services via virtual incubation to the spin-off companies of the university;
- supporting the university researchers in commercializing their research results. It is advised to the researchers to keep contact with the Center during the research projects in order to get relevant information about business potentials behind their research results;
- staff of the Center provides support in the matters of IP protection, commercialization, collaboration with industrial partners, establishment of spin-off companies, university IP regulations and other innovation-related questions;
- has excellent relationship with the main stakeholders of the region, as well as with different national and international actors;
