## ADDRESS:

Via Verdi 8  
10124 Torino

## WHAT I WANT TO GET OUT OF THE NETWORK:

- exchange experiences and initiate news contacts

## WE ARE THE ORGANIZATION THAT:

- is one of the most important national research center concerning primary production and processing of plants and animals, as well as the interactions of these activities with the territory and the environment;
- studies agrarian and forest ecosystems and agri-food supply chains in their biological, productive, ecological, technological, engineering and management aspects through a biotechnological and multidisciplinary approach;
- has excellent research facilities and a dynamic work group, it collaborates with researchers from other bodies, feed producers, suppliers of raw materials and breeders in order to be present at 360 ° in the territory;
- the DISAFA facilities include research laboratories with highly specialized tools for microbiology, physics, chemistry, feed and food bromatological analyzes and sensory analysis laboratories;
