## ADDRESS:

ul. Witolda Chodźki 7  
20-093 Lublin

## WHAT I WANT TO GET OUT OF THE NETWORK:

- seek parties interested in in-licensing and/or collaborative research to develop and commercialize of a pharmaceutical products and participation in the drug development process;
- initiate business contacts with founders of biotechnology and pharmaceutical companies and find out about the challenges they faced;
- gain knowledge on potential funding opportunities;
- provide an overview on how to identify an invention and how to assess its technological and commercial potential;

## WE ARE THE ORGANIZATION THAT:

- is responsible for the comprehensive support of the commercialization and practical implementation of the results of scientific work;
- our main target is technology brokering by offering new technology for licensing and other forms of commercialization and cooperation with companies;
- main research streams are disease prevention and drug development;
- offers patents, licenses and know-how, within the fields of medicine, pharmacy and biotechnology. Our database consists of: bone substitute material, new ingredients to be used for medicines and drug production for cancer, heart diseases etc., wound-dressing technologies and many others;
- focus on building the broader collaboration between Polish as well as foreign researchers and entrepreneurs, representing various fields;
- cooperates with research centers from Europe;
