## WHAT I WANT TO GET OUT OF THE NETWORK:

- business and scientific partners

## WE ARE THE ORGANIZATION THAT:

- it integrates agricultural, biological, veterinary, technical, economic and social sciences;
- has main targets: Business Environment Institutions, small, medium-size and large companies, self-government units, R&D units , NGOs;
- has modern, well-equipped labs and workshops for 7 Faculties;
- research conducted in modernly equipped laboratories and the University workshops, clinics and experimental farms are a valuable contribution on the development of agricultural, veterinary and nature sciences;
- has experimental farms with an area 1646 hectares;
- the University has considerable achievements in the development and implementation of recultivation projects and the management of mining fields devastated in the process of mining (especially sulfur), the research into renewable energy sources and pro-ecological agriculture;
- has 40 patent applications per year (half in this number of patent applications is for biotechnological inventions);
- cooperates with a number of universities under bilateral agreements;
